

David Chia

Product Designer · UX/UI Designer

Barcelona, Spain · dcbediciones@gmail.com · davidchia.es

PROFILE

Product Designer with experience taking digital products from discovery to production. I combine UX Research, interaction design, UI and Behavioral Design to turn complex problems into clear, intuitive and polished experiences. I have worked with prototypes, testing, design systems and Product and Engineering teams, connecting user feedback, business goals and technical feasibility. I am especially interested in designing products that help people understand information and make better decisions.

EXPERIENCE

The Wise Dreams Product Designer & Product Owner

2024 — 2026

- Defined flows and experiences for AI, LLM, virtual reality and travel-tech products.
- Translated user, business and technology requirements into product decisions, prototypes and deliverables.
- Aligned a multidisciplinary team of 10 people across Agile cycles, from definition to delivery.
- Designed a B2B SaaS experience connected to Meta Quest 3 to preview hotels and destinations before purchase.

Agile Monkeys Product Designer

MAR — APR 2024

- Conducted qualitative research and 4 interviews for an AI product concept applied to Discogs.
- Synthesized insights, identified friction points and connected user needs with business goals.
- The research redirected the proposal toward saving on shipping costs through group purchases.

Smartvel UX/UI Designer

JAN — SEP 2023

- Designed B2B experiences for international airlines, from flows and prototypes to a responsive interface.
- Ran UX audits, prototyping and testing to validate and improve solutions.
- Contributed to the design system and worked with Product and Engineering on releases and iterations.

Konvent Cultural Event Coordination and Production

2017 — PRESENT

- Operational coordination and production of cultural events in a multidisciplinary environment.

SELECTED PROJECTS

K-Rooms Product Designer / Builder

2026 — PRESENT

- Custom product for managing the rooms and stays of a cultural center.
- Optimized architecture, flows and UI for map, occupancy, people and residencies, with responsive design geared toward fast operations.

Pujobaixo Founder / Product Designer

2026 — PRESENT

- Digital carpooling product between Barcelona and Berguedà.
- Defined the proposal, flows and UX/UI and took the product to a working MVP with AI-assisted development.

Cappy 1st Prize · EcoHackathon Itainnova

2023

- Award-winning concept to optimize the use of private parking and reduce the environmental impact associated with cars.

SKILLS

UX/UI	UX Research · Interaction design · Behavioral Design · Information architecture · Heuristic evaluation · Heuristic patterns · Usability · User flows · Wireframing · Prototyping · User testing · Design Systems · Responsive UI · Accessibility · Visual hierarchy
Product	Discovery · Problem definition · Prioritization · Roadmapping · Backlog · Agile delivery · MVPs · Alignment with Product and Engineering · Data-informed decisions
Tools	Figma · GA4 · GitHub · Jira · YouTrack · Notion · Framer · Claude · ChatGPT · Adobe CC
Languages	Catalan and Spanish: native · English: professional level (B2)

EDUCATION

- AI for UXers · Interface School · 2026
- Behavioral Design Bootcamp · 2025
- Product Design Bootcamp · Northcamp · 2023
- UX Research · Coderhouse · 2022
- Web Project Management · Elisava · 2016
- Fine Arts: Art and Communication · University of Barcelona (UB) · 2008 — 2013

WORKING APPROACH

Understanding the problem before designing the solution, making design decisions explicit and validating early through research, prototypes and feedback. I aim to balance clarity, visual judgment, usability and technical feasibility, and to work closely with product and engineering until the experience works in production.

PORTFOLIO

Product cases with process, decisions and outcome: davidchia.es
